

Computing Journey: Year 7

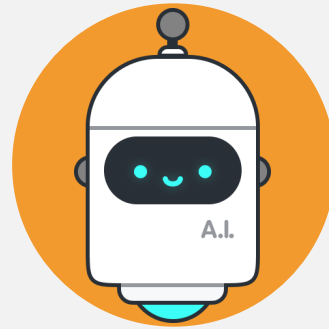

HTML Web Page Design

Programming using HTML and CSS to design interesting web pages

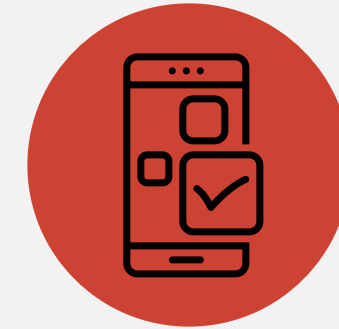

How AI Works

Studying, and exploring through models, how generative AI works. What are its opportunities and its challenges?

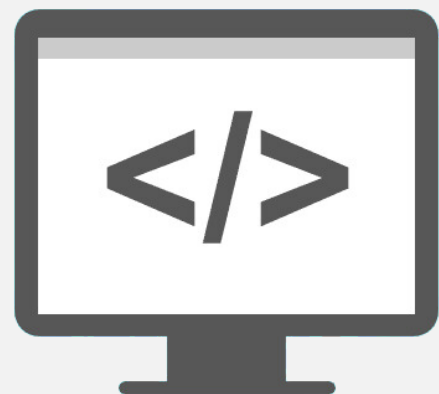

Programming 2: App Design with AppLab

Use a block-based version of JavaScript to create an interactive phone app

Programming 1: Introduction to Python

First steps in text-based programming

HTML and CSS 2

Increasing your skills to create sites of linked pages with consistent design
